

Problems we solve

- Lack of integration across tools & vendors
- Lack of digital & AI enablement for providers
- Manually handled operational complexities
- Fragmented patient & caregiver experience

Our Home & Digital Care Enablement

Our Impact & Client Feedback

70% reduction in cost and time of technology implementation

3X lower total cost of ownership (TCO) with buy to build approach

80% time saved for physicians on each patient care plan

Enabling 90+ NPS with exceptional patient experience

More than 65% patient engagement each month

Self-paying platform with savings exceeding licensing costs

Savings 20 minutes per patient onboarding

“As Care2U works to revolutionize the delivery of acute care by reconstructing all the intricate processes that occur in the hospital to the home environment, we needed a partner that could build a configurable solution to optimize workflows and achieve scalability. Azodha has been a fantastic partner, their comprehensive platform and rapid cycle innovation have helped Care2U achieve its vision of being a technology enabled provider of hospital-level care in the home.

Kevin Munjal | Chief Medical Officer @ Care2U

“Azodha’s platform has indeed been a game changer for our team. What truly distinguishes Azodha is their strategic collaboration, innovation, and adaptability to address our intricate requirements, significantly improving our CSAT, operational efficiency, and resource optimization.

Allen Dine | VP of Operations, @ Care2U
